<sup>1)</sup> To date, no figures have been made available for France, South Korea or China since ISCED 2011. These countries are therefore not included in the table. Instead, three European OECD countries were included to supplement the results: Belgium, Finland and Italy.

<sup>2)</sup> The table shows the university entry rates according to the ISCED classification for levels 5, 6 and 7. Please note: figures from 2013 and later were compiled according to ISCED 2011, figures before 2013 according to ISCED 97; this table is therefore not comparable with previous years. ISCED 2011 used here has nine levels, while ISCED 1997 only had seven. ISCED 2011 distinguishes between four instead of two levels in the field of higher education (ISCED 1997: Levels 5A and 6; ISCED 2011: Levels 5 to 8) and enables a distinction to be made between 'general and vocational upper secondary education without direct access to tertiary education (ISCED 3\*) on the one hand and 'general and vocational upper secondary education with direct access to tertiary education (ISCED 3\*\*) on the other.

<sup>3)</sup> Adjusted rate for under-25s, excluding new international tertiary students.

\* The missing figures are not shown due to a data error. For further information on the calculation of the rates for Switzerland, see Gehrke et al. (2019), Chap. 4.1.7.
